

Over-molded Battery Connectors (Euro)

D70 Female Battery
Connector

D73 Male Battery
Connector

Over-molded Euro Charging Plugs and Cable Assemblies

Features & Benefits Include:

- Compatible with DIN43589-1 battery connectors
- Male and Female Over-Molded connectors available
- IP65 sealing for charging applications
- Silver-plated contacts for charging up to 350A, 600V
- Rugged contacts designed for low insertion force
- Excellent resistance to moisture/chemicals and severe outdoor wear and tear
- Up to four auxiliary contacts available
- Tailored to your cable gauge and assembly length

The Anderson D70 Over-molded Battery Connector per the DIN43589-1 specification provides users with a true water-tight configuration for fast battery charging systems. A first-of-its-kind connector, over-molded to provide an IP65 sealing ensuring performance in all battery environments.
